

Molecular Training

Advanced LightCycler Training

This one or two day workshop is designed for experienced LightCycler operators to extend their knowledge of the LightCycler system and the unique software options. A detailed overview of all modules will be covered in a two day course, or alternatively, a one day course can be constructed from software analysis modules of interest.

Topics to be covered include:

- Brief overview of hardware
- Detailed overview of all analysis modules
 - o Absolute Quantification
 - o Qualitative Detection
 - o Relative Quantification
 - o Genotyping
 - o Tm Calling
 - o Color Compensation
 - o Nucleic Acid Quantification
- Creating and Using Macros
- Helpful tips for streamlining workflow
- Troubleshooting

Dates: 27th - 28th April 2010
