

A Beginners Guide to High Resolution Melting

This one or two day workshop will introduce participants to the theory of High Resolution Melting and its application for sequence variant discovery and known variant typing. It is intended to extend the knowledge of researchers with access to the LightCycler 480 system and to introduce new users to the concepts behind High Resolution Melting.

The Course includes both theory and practical sessions using the LightCycler 480 System with detailed discussions of the underlying technology and software analysis that makes this technique possible. Specific assays may also be developed during the course depending on the needs of the registrants.

Dates: 10th-11th August 2010

Time: 9:00am to 5:00pm

Location: RDNZ Training Laboratory
15 Rakino Way
Mt Wellington
Auckland

Trainer: Fabrice Merien

Cost: \$300.00 + GST per day
