

Haematology Training

Sysmex X-Series Advanced Training

Separate courses are available for XE-2100 and XT-1800i/2000i.

This two day course is the next step for experienced operators of the X-Series analysers. An opportunity to build on the knowledge gained during "Operator" training and actual laboratory practice with the analyser. The course will review some fundamental areas of analyser operation and function and extend this with application of this knowledge to analyser set-up, monitoring and particularly troubleshooting.

Topics covered include:

- X-Series Technology review
- Sample flow and hydraulics
- Analyser Errors
- Calibration
- IPU Software Functions
- Quality Control
- Sensitivity Parameters
- Troubleshooting scenarios (Results based and Analyser based)
